POCKET SPRING

A comfortable and breathable upholstery construction of high quality, designed for comfortable sitting and sleeping. A combination of quality steel frame and 7" pocket spring topped with a core of freon-free polyether foam with one layer of carded cotton underneath. The cotton core is environmental friendly as our production facilities makes it possible for us to use our excess foam in our mattresses.

EXCESS POCKET SPRING

A luxury mattress of high quality and longevity, which ensures maximum support and comfort that will keep you dreaming all night. The Excess Pocket Spring is constructed with a 10" pocket spring surrounded by a core of freon-free polyether foam. Two layers of breathable, carded cotton on top and one layer of carded cotton underneath makes it highly resilient.
